

# Mobility Tricycle For Sale

Draisin Mobility Trici - this tricycle is less than one year old and is for adults or teenagers with a disability. The owner is a stroke survivor so uses this bike with just one arm, (the controls can be put on either side). There are platforms for the feet (can be converted back to normal pedals easily) and a really comfy, height adjustable seat with removeable back rest with safety harness. The brakes are shimano v brakes. The bike is NOT geared so very easy to control. There is a basket for shopping etc. It has been used less than 20 times and cost £2500, we are open to offers... It is extremely easy to learn to ride and has parking brakes so it is safe to get on and off with a step through frame.

**£950.00 ono**
